

BOGDAN NICULESCU

Bristol, BS162AE | M: +44 (0) 7438786322 | bn.workdev@gmail.com

PROFESSIONAL SUMMARY

I'm a junior software developer with a passion for both front and back end development. I aspire toward a career that will allow me to channel my creativity through crafting beautiful software and engaging experiences. I am now looking for a challenging role in the tech industry.

EXPERIENCE

01/2020 to 04/2020

Junior Software Developer nology — Bristol

12 week project based training course, involving the development of a prototype web application for an external client using ReactJS, as well as working on challenges and personal projects. I learnt the fundamental skills required to become a Junior Software Developer.

- Agile working environment, with daily stand up-stands and weekly retrospectives.
- Highly collaborative work, involving many group projects, with our client project being executed wholly using pair programming.
- Did code reviews to my other colleagues before they merged their work into GitHub repository.
- Worked remotely for half of the course including the work with our external client.

10/2017 to 01/2020

Service Technician Panasonic Manufacturing UK — Cardiff, South Glamorgan

- As a technician was inspecting, repairing and testing both hardware and software, Toughbook units from our clients. I was working actively in two teams, the return merchandise authorization (RMA) team and the Demo team where I was inspecting, diagnosing, repairing and testing Toughbook units. In the Demo department I managed to implement along with my team a workflow for inspecting, testing and repairing units.

05/2015 to 08/2016

Insurance Sales Consultant NN Romania — Deva, Romania

- Identify potential customers
- Evaluate the financial needs and find the best solutions for them Promote NN financial services and products
- Permanently inform your clients about all the financial news that might interest them
- Permanently develop the relationship with the clients

CORE QUALIFICATIONS (as junior software developer)

- Currently I am learning a NodeJS full course (Udemy, self-taught), using Express.js, SQL databases (mySQL), noSQL databases (MongoDB), Mongoose.
